Thanks, Tom! Yes, there's been a flurry of communication on this over the last few weeks, and I've been responding to it.

**Subject:** FYI, Air Division Weekly Item on a Uranium Mine

You've probably heard about this, but I thought I'd pass it along just in case:

Canyon Uranium Mine: Canyon Uranium Mine in Arizona: We have received an application to construct from Energy Fuels Resources for the Canyon Uranium Mine. The mine is located in the Kaibab National Forest, below the Grand Canyon. The mine was originally sited in the early 1980s but never opened because of falling uranium prices. In coordination with the Tribal Office, we will consult with local tribes during the review process. Our regulatory authority is narrow and sets a radon emissions limit from the mine at the nearest receptor. (Contact: Shelly Rosenblum, 7-4193)
